25-Oct-2020

Dear Fred,

The manuscript is substantially revised, thank you. In particular, the extended examples with research questions provides the necessary context. We are pleased to accept the manuscript for the special issue, and we look forward to having it in place with the other pieces. There are a few remaining typographical-type errors to fix.

Do you think you will be able to send in a revision by, say, Nov 25? We are quickly coming upon the special issue deadline, yikes! Please let me know if you have any questions.

* unfortunately, I don't think JSE has formatting guidelines for packages. However, they should be internally consistent in your paper (e.g., bold, quoted, without format, etc.): rtweet, tidytext, lubridate,...

* API stands for application programming interface (not application product interface)

* how was table 1 ordered? As is, the sorting is (seemingly?) arbitrary, and I think it would be easier to read if sorted. I'd suggest one of two ways:

- sort by order of category
- sort by the order in which the skills are performed in a standard data analysis.

* page 10, line 12 "eg., " should be "e.g.,"

* page 10, line 32. You discovered evidence to "support his strategy" ... what is his strategy? Do you mean to "support his hypothesis"? or maybe to "support his ideas" ?

* page 10, line 34 "We share below a case study based on this approach." I'd clarify to say "Below, we share a case study on a different widely discussed topic which is analyzed using an approach similar to that from the Super Bowl tweets."

* page 12, line 32 ... still something is off as I read the word JSON. You write: "Below is an example of JSON for one tweet." Here are some possible alternatives:

- "Below is an example of a JSON entry for one tweet."
- "Below is an example of a JSON file for one tweet."
- "Below is an example of a tweet in JSON format."

* "to wrangle the tweet JSON into" (instead change to: "to wrangle the JSON tweet into" or "to wrangle the tweet JSON data into") page 13, line 46

* I think "document by term matrix" should be "document-term matrix"

Form letter to follow.

Thanks, Jo

Dear Dr Boehm:

Your manuscript entitled "What is happening on Twitter? A framework for student research projects with tweets", which you submitted to Journal of Statistics Education, has been reviewed (see comments above).

The reviews are in general favorable and suggest that, subject to minor revisions, your paper could be suitable for publication. Please consider these suggestions, and I look forward to receiving your revision.

Please revise your paper accordingly. When you submit your revision, we strongly encourage that you create a PDF file called "Reply to Reviews" (or similar) that contains your point-by-point responses to the reviewers' comments. Then upload that file as a pdf, using the "Author Response" file designation from the drop-down menu on File Upload page. Please be sure to blind your response file.

When you are ready to submit your revision, please use the link below. Upon receipt, your manuscript will be returned to the associate editor (and, possibly, the reviewers) who will determine if your revisions are satisfactory.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

https://mc.manuscriptcentral.com/ujse?URL_MASK=249280abc91c4c7abea387d29c191021

This link will direct you to the first page of your revised manuscript. Attachments from the reviewers will be found at the bottom.

We also ask that you upload your source files at this time. Please upload the following:

- A PDF of your final paper
- The TeX or Word file containing your final paper
- All figure files as separate files
- Any additional files needed to compile your article. For example, .bbl and .bib files if you used BiBTeX (and we hope you did!), and any special macros
- Finally, a completed License to Publish an Open access article form, signed only by the corresponding author on behalf of all authors. A blank form is attached to this message.

Please consider grouping the related files into zip files for uploading. You can use the drop-down boxes next to each upload field to designate which files are contained in the zip files.

IMPORTANT: Your original files are available to you when you upload your revised files. Please delete any redundant files before completing the submission.

If you have any questions, please feel free to contact Eric Sampson, ASA Journals Manager, eric@amstat.org.

This link will remain active until you have submitted your revised manuscript. If you begin a revision and intend to finish it at a later time, please note that your draft will appear in the "Revised Manuscripts in Draft" queue in your Author Center.

Upon submitting your revision, you will be asked if the manuscript has been submitted to the journal previously. Click 'Yes' and then cut-and-paste the manuscript number from the email you received.

Because we are trying to facilitate timely publication of manuscripts submitted to Journal of Statistics Education, your revised manuscript should be uploaded by 25-Oct-2021. If it is not possible for you to submit your revision by this date, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to Journal of Statistics Education and I look forward to receiving your revision.

Sincerely,
Dr Johanna Hardin
Editor, Journal of Statistics Education
jo.hardin@pomona.edu
